PROFESSIONAL SUMMARY

BI leader with 8+ years of experience building BI infrastructures, leading analytics teams, and delivering enterprise-scale reporting. I focus on making data reliable, governed, and immediately useful for decision-making.

Business Value I Deliver:

- Build and scale BI functions end-to-end to enterprise scope (operating model, roles, delivery cadence, SLAs).
- Standardize reporting with a governed design system: style guides, reusable templates, automated deployments and migrations.
- Automate and secure data flows: dependency-aware REST API integrations, access and permissions lifecycle management, alerts, etc.
- Align BI strategy to business KPIs and decision workflows, improving time-to-market and operational performance.
- Develop custom Tableau extensions and internal admin tools to address domain-specific requirements.

SKILLS

- Tableau Desktop
- Tableau Server
- SQL (SSMS, Snowflake, ClickHouse, MySQL, PostgreSQL)
- Data Visualization
- Apache Airflow
- Leadership & Team Management
- Tutorship & Mentorship
- Python (Automation, API Integration, Data Transformation)
- Cloud Platforms (AWS, GCP)
- Power BI
- Apache Superset
- Looker

EDUARD NIZAMOV

HEAD OF BI | SENIOR TABLEAU DEVELOPER | BI PRODUCT OWNER

EXPERIENCE

Head of Business Intelligence | 01.tech

Nov 2023 — Present

Managing the BI department, roadmap, and platform; scaled enterprise analytics to 1,500+ users across 50+ business streams while maintaining consistent quality.

- **Infrastructure & governance:** implemented Tableau Server with secure architecture; standardized workflows; enforced a unified style guide and templates.
- **Automation & security:** orchestrated dependency-aware refreshes and integrated REST API-based deprovisioning with HR to safeguard access.
- **Scale & adoption:** expanded BI reach to 1,500+ users and 50+ business streams through reuse-first patterns and consistent delivery.
- **Scalable delivery:** introduced out-of-the-box deployment patterns (scripted replication via API/XML) enabling 20+ dashboards to launch in 2 minutes.
- **Reporting products:** delivered 500+ dashboards across various business-domains.
- **Custom extensions:** developed bespoke visualizations and admin extensions to meet domain-specific needs and avoid paid market add-ons.

BI Team Lead (Tableau) | 01.tech

Jun 2023 — Oct 2023

Launched Tableau as a product and established the foundation for governance, automation, and product monitoring.

- Authored the Tableau style guide and set up initial documentation.
- Implemented smooth refresh process to ensure 100% data freshness.
- Built admin/usage dashboards (user activity, permissions, inactive assets) and embedded a feedback mechanism into templates to guide improvements.
- Secured executive buy-in for BI as a strategic product and initiated organization-wide adoption and upskilling.

Data Analyst Profession Course Author & Tutor | ITCareerHub

Aug 2023 — Present

- Designed an extensive Tableau training course with 16 lessons, guiding students from introductory to intermediate levels.
- Conducted 100+ webinars for 100+ students, evaluated homework and projects.

BI Mentor | GetMentor.dev

Feb 2023 — Present

Conducted training for BI teams and educated employees on effective Tableau use as a mentor and consultant.

- Developed an upskilling program to enhance mentees' skills and guided analysts.
- Provided consultation on Tableau implementation, helping companies overcome data analysis and visualization challenges.

BI Analyst / BI Team Lead | Upwork

Aug 2020 — Dec 2023

- Constructed 20+ complex reports in PBI and Tableau for diverse industries, including payment transactions, sales, P&L, forex trading, and mobile games, serving US and European markets as a Senior Dev and Team Lead for team of 4.

Senior Tableau Developer | AbbVie

- BI Strategy
- Data Analytics
- Data Governance
- ETL

Community Contributions

- Authored and taught a comprehensive Tableau course for an international school, enhancing the skills of 10+ BI professionals and 100+ junior students.
- Speaker at the first Serbia Tableau User Group on “Elevating BI Product: Mastering Tableau Server Metadata” for 80+ offline audience.
- Speaker at the Tableau User Group | Christmas Edition on “Simple Yet Effective: Practical Tableau Tips” for 80+ offline audience. Links to YouTube and Medium available in profile.

Industry Experience

Aviation & Airlines, HoReCa, Game Development & iGaming, Forex & Cryptocurrency, Healthcare & Pharmaceuticals.

CERTIFICATIONS

- Power BI: Data Analysis and Visualization
- Python Basics and Data Analysis
- SQL and Data Acquisition
- BI Developer: Tableau Basics
- Analysis and Statistics for Business
- Metrics, Hypotheses, Growth Points
- Tableau Professional
- SQL Advanced
- Python Libraries for Data Analysis
- Data Analysis in Kname
- Share Data Through the Art of Visualization

Dec 2022 — Jun 2023

- Created & optimized 20+ Tableau reports, improving load times by 25%, while managing Tableau Server for 100+ users and co-authoring a BI style guide.
- Implemented a User Management Report using REST API and Python, resulting in identification of 50+ underutilized accounts and irrational usage of 5 data sources.

Lead BI Engineer | Luxoft

Mar 2022 — Dec 2022

- Handled diverse tasks: collaborating with business stakeholders, preparing data sources, developing Tableau reports covering 400+ end-users with my products.
- Supported 5 internal departments by creating and maintaining BI tools (20+ dashboards) to enhance performance.
- My leadership included conducting ~20 technical interviews, mentoring and onboarding new team members, leading sprint planning and tech reviews for a team of 12 analysts.

Analytics Specialist | Luxoft

Feb 2021 — Mar 2022

As a full-stack Tableau developer, I achieved the following:

- Developed and delivered 20+ high-impact Tableau reports, including designing dashboards, integrating interactive elements, managing row-level security, preparing of data sources in SQL and presenting dashboards to 50+ end-users.
- Streamlined Tableau Server administration, managed permissions for ~3000 users and optimized 10+ background tasks for improved performance.

Sales & Marketing Analyst | Turkish Airlines

Dec 2014 — Feb 2021

As part of the Sales & Marketing and Airport Operations teams, I led the comprehensive development of the regional office, where I achieved:

- Built 3 reports using MicroStrategy DWH, Midas, and Power BI to conduct competitor analysis, uncovering 10–15% fare adjustment opportunities that boosted profitability by 12% and passenger traffic by 8%.
- Generated an operational performance report that identified flight delays caused by handling companies’ issues, enabling SLA negotiations that reduced service costs for Turkish Airlines by 15% and improved on-time performance.
- Awarded first place twice in the Corporate Innovation and Projects Directorate for valuable ideas, with a total of 7 submitted ideas.
- Trained 5 new employees, enhancing team skills and operational efficiency.
